

We are all beautiful in our own unique way! With my skin care line I want to enhance your natural beauty, so that you can confront your day with confidence and be the powerful woman that you already are.

Just like the lotus flower finds its way through the mud and blooms like no other flower, I want you to bloom no matter your skin condition or your life situation.

Lotus Beauty is here to take care of your skin and assist you in discovering the best of you.

Our main goal is to give the mom-preneurs a spa feeling in the comfort of their own home. As a mom-preneur myself, I feel the need to be primped at least once a month.

Since having kids is a big responsibility, I barely have the time to take care of myself. It is very important for me to have some personal time, it helps me start the day with much more energy and focus.

This is a gift that I want to pass on. The value of having time for yourself reflects your inner peace and self love. When you take care of yourself, you are able to take care of others with much more love and dedication.

Therefore, I developed this concept to help mom-preneurs have that relaxing moment without leaving home.

I have developed a skin care line which suits every type of skin. There is a variety of bath salts that improve the condition of it and help you loosen up throughout the day. Additionally, our face masks help you enhance your natural beauty by extracting impurities.

To complete this total spa and relaxation day at home, sugar body scrubs and body butters are essential.

The only thing you need to do is to light some candles, have a cup of tea or a glass of champagne, deem the lights and plan your dreamy spa day at home.
